# IT COURSES

Trust Communication Training Institute (**TCTI**) operates unique but a low-cost computer training programmes. They are unique courses because they are provided in a step by step guide and straight forward, easy-to-understand language. No experience is required in any of the Computer courses. Computer courses are offered in line with such professional bodies as; IMIS and ICM syllabus and centre designed modules.

Trust Communication Training Institute (**TCTI**), has gained more popularity over the years in the area of PC Repair and Maintenance. We offer both IT and PC Repair and Maintenance programmes to meet the rapidly growing demand of modern Information Technology.

**TCTI** also organises Corporate or on-site training, computer summer classes every year for school children during their long vacation Holiday. The children are given a first class foundation in computer awareness, computer appreciation and keyboard skill.

Desktop publishing is made up of tailor-made courses for those who want to develop their artistic skills. This application includes:

We train interested individuals for PowerPoint Presentation. This unique application prepares people who present speeches in Conferences, Seminars and Workshop.

## Information Technology Courses (IT)

- ❖ Certificate, Diploma and Advanced Diploma

## English Language Courses

### IT related engineering

Our hardware programme is to train those whose vision are to become future computer engineers. We have a well equipped PC Repair laboratory with various types of Hardware Components, Computers and Software for the student's identification purposes. This programme is divided into the following parts namely:

- **PC -REPAIRS**
- **A+ certification**
- **Network+ certification**
